## **Refractory Anchors**

LAVA have been designing and manufacturing refractory anchors for over 10 years and offer an extensive range of high quality standard and custom made refractory anchor products for a variety of linings and lining depths.

Our experience has let to the development of unique range of clever anchoring systems that offer our clients a flexible, reliable and cost effective solution to secure refractory linings.

We offer full in-house design and manufacturing for fast turnarounds on custom anchor designs. Additionally we hold a comprehensive range of common anchor shapes and sizes in stock.

Anchor Types Inculde:

- Y & V Anchors
- Welded & Twisted Anchors
- Split tyne, Stud Welded and Rotalock Anchors
- Christmas Tree and Strap Anchors
- Ceramic Anchor Brick Clips
- Shelf & PV Anchors
- Shelf Brackets & Fabricated Parts
- Ceramic Fibre Fixings

## **Material Selection**

Alloys behave differently in different environments and temperatures. Therefore the choice of material is critical for the refractory anchor. LAVA's experience can assist with determining the most appropriate materials for each individual application.

LAVA supply anchors in a variety of material options including standard heat resisting alloys such as 304, 310 , & 253 and can also supply specialist alloys such as 301 and DS in variety of diameters.

For special requests please contact us for a custom quotation and lead time.
